

CUSTOM LED WALLS

Digital Surfaces for Premium Brand Spaces.

Custom LED wall packages for automotive showrooms, hospitality, retail, and gallery environments.

THE SPACE

Scale Without Visual Compromise.

Premium commercial environments need display surfaces that support the quality of the space. In automotive showrooms, hotels, casinos, retail flagships, and galleries, visible bezels or underpowered screens can weaken the visual experience.

Baikal Star helps project teams source and prepare scalable COB LED wall packages for high-visibility interiors. Packages can be reviewed for brightness, viewing distance, service access, controller requirements, spare modules, and long-term maintenance planning before shipment.

BEFORE THE SITE

Prepared for Integration.

Commercial timelines require clear documentation, coordinated logistics, and hardware that is reviewed before it reaches the site. Baikal Star helps reduce uncertainty by preparing a documented package for the client's licensed GC, AV integrator, electrician, or project team.

- Controller planning using NovaStar MX2000 Pro or approved equivalent
- Factory QA coordination before shipment
- Spare-module planning for service continuity
- Documentation for control protocols, dimensions, and service access
- Logistics planning to the project location

WHERE IT LIVES

Use Cases.

Automotive Showrooms

LED wall packages for configurator areas, brand walls, reveal spaces, and showroom focal points.

Hotels & Casinos

Large-format LED wall packages for lobbies, lounges, gaming floors, VIP rooms, and hospitality environments.

Retail & Galleries

Premium LED wall packages for flagship retail, exhibitions, brand storytelling, and curated visual environments.

SCOPE

Clear Project Boundaries.

Baikal Star supports the display package. Site work, electrical, permitting, and mounting are handled by the client's licensed project team.

BAIKAL STAR

- System specification support
- OEM sourcing coordination
- Factory QA coordination
- Logistics planning
- Spare-module planning
- Project documentation

PROJECT TEAM

- Physical installation
- Electrical work
- Low-voltage wiring
- Mounting
- Structural work
- Permits and on-site construction

Installation and site work are handled by the client's licensed project team. Baikal Star does not perform on-site construction.

NEXT STEP

Start a Project Review.

Share the project type, display dimensions, site conditions, timeline, and project-team structure. Baikal Star will review the package direction and prepare next-step guidance.
