

CUSTOM LED WALLS

Custom LED Walls for Luxury Homes.

High-brightness LED wall packages for private residences, great rooms, cinemas, and entertainment spaces.

THE ROOM

Built for Bright Interiors.

Modern luxury homes often include open floor plans, floor-to-ceiling glass, and rooms where a projector or oversized television may not fit the architecture.

Baikal Star helps source and prepare custom COB LED wall packages for these spaces — sized to the room, reviewed for viewing distance and brightness needs, and delivered with documentation for the licensed project team.

WHY BAIKAL STAR

A Prepared Package for Your Project Team.

Baikal Star supports the project team before the display reaches the site. We help coordinate sourcing, factory QA, spare-module planning, logistics, and technical documentation so the licensed contractor, AV integrator, or design team receives a clearer package to work with.

- Fine-pitch COB LED wall sourcing
- Factory QA coordination before shipment
- Spare-module planning from the same production batch where available
- Logistics planning to Los Angeles
- Documentation for dimensions, controller configuration, service access, and control protocols

SCOPE

Clear Project Boundaries.

Baikal Star supports the display package. Site work, electrical, permitting, and mounting are handled by the client's licensed project team.

BAIKAL STAR

- System specification support
- OEM sourcing coordination
- Factory QA coordination
- Logistics planning
- Spare-module planning
- Project documentation

PROJECT TEAM

- Physical installation
- Electrical work
- Low-voltage wiring
- Mounting
- Structural work
- Permits and on-site construction

Installation and site work are handled by the client's licensed project team. Baikal Star does not perform on-site construction.

CONFIGURATIONS

Reference Package Direction.

Three reference configurations cover the range of luxury residential installations. Each package is configured to the room.

Signature P0.7

For close-viewing private cinemas, boardrooms, and detail-critical interiors.

Signature P0.9

A balanced fine-pitch option for luxury interiors, great rooms, and premium residential spaces.

Signature P1.25

For larger rooms, open spaces, showrooms, and large-format architectural surfaces.

NEXT STEP

Start a Project Review.

Share the room dimensions, viewing distance, project type, and preferred display location. Baikal Star will review the package direction and prepare next-step guidance for your project team.
